

Evolving beyond banking together

Banks today are under enormous internal and external pressures: rapidly evolving customer expectations, changing regulatory conditions, accelerated digital transformation, and increasing competition.

This means banks like ING need to rapidly adapt and transform to create and deliver more differentiated and personalized customer and employee experiences, secure-by-design operations, and scalable and faster innovation.

How can NTT help ING prepare for a faster, more digital and interconnected world?

By providing...

An industry-leading 'digital backbone'

Multi-cloud security

Greater visibility and control

As a Global Technology Accelerator, NTT can support ING to enable more simplified, agile, innovative, and customer-centric operations, through:

Enhanced employee experiences

- Intelligent, hybrid workspaces
- Secure working environments

Secure-by-design operations

- Dedicated SecOps center
- IT center of excellence
- IT team augmentation

Technology and infrastructure modernization

- Migration to hybrid cloud
- Flexible, next-generation network infrastructures

A seamless and interconnected organization

Supporting ING in its vision to become a leading data-driven digital bank that is both...

...local

Ability to account for local and specialist requirements

Supporting seamless migration into the cloud enabling workloads and application to perform at their peak

Ability to innovate, scale and expand rapidly with new products

Making every interaction richer and more personal

Aligning to specific country and regional regulatory frameworks

...and global

Ability to operate as one global business with better visibility and control

Building a flexible next generation digital bank

Ability to deliver new services to meet market and customer needs

Driving increased value and improved customer and employee retention

Assuring that your digital programs are secure-by-design

A Global Technology and Infrastructure Accelerator

Supporting ING to achieve this through:

Strength in network services and security, tailored to your requirements

Flexible, agile, future proof, 'go anywhere' digital capabilities

'End-to-end' digital backbone

Long-standing partnerships with major tech providers

Securely connecting end users from any location

Global, regional and local agreements to **meet governance and strategy**

Global team of experts and partners

Recognised leadership in network and security
